

January 3, 2022

**NOTICE**

**COVID UPDATE  
For January 3, 2022**

To Residents Families Friends and Responsible Parties,

After the holiday weekend, we have had additional staff members at **Hearthstone, 4<sup>th</sup> floor assisted living** and **2<sup>nd</sup> floor skilled** test positive. We are now in outbreak status and staffing levels are critical.

Residents on **4<sup>th</sup> floor and Hearthstone** were tested last week, and all were negative with the quick test and PCR test. We are again testing residents today with the PCR test. Staff continue to be monitored as they arrive for work or call in with symptoms. All admissions have been stopped except for those from the Fairhaven community.

To Visitors, PLEASE if you have been exposed to someone with covid, having any symptoms or awaiting test results, **postpone your visit**, (unless compassion, palliative, or hospice visit).

All visitors, staff and contractors need to enter, and exit from the main entrance so appropriate monitoring takes place; temperature check, exposure questions and **surgical mask(required)**.

**Be considerate, do not take the chance of exposing your family member or the Fairhaven Community.** Visiting after being exposed places everyone at risk and will limit or ability to serve or care for those exposed. As we are in outbreak status this places a huge strain on our limited availability of staff.

For apartments residents if you have been exposed, please remain in your apartment, and contact the front desk so staff may follow up. Monitor yourself for any symptoms over the following days and limit your visiting.

**All** residents should wear a surgical mask when in the halls, common areas or participating in any activities. Apartments residents with guest and you do not know the vaccinations status a mask should be worn during the visit.

As you have any questions, please contact us at 262-473-2140.
