

Fairhaven Announces Renovation Plan

Fairhaven Senior Services in Whitewater, WI has announced a \$10 Million dollar renovation plan to update and add Community Based Residential Facility (CBRF) Assisted Living units to our 2nd, 3rd, and 4th Floors in our Main Building. Renovations are set to start during the month of September and once completed in the Summer of 2024, will have a total of 47 units along with added lounges on each floor. On our 3rd and 4th floors will be a total of 24 units which will feature a walk-in kitchenette, living space and a fully accessible bathroom with walk in shower. Our second floor, which will consist of 23 units, will offer a more intensive level of services and care. Each floor will operate independently offering the services that we currently have on our 4th Floor Assisted Living.

Paul Kuenning, Fairhaven's President/CEO said he believes this renovation will offer the community and surrounding area a level of service and care that is currently and will be needed in the future. This will ensure that Fairhaven may continue its mission as a visible ministry of God's love for older men and women and to offer a community where "Life is Added to Years".

We have started our communication with residents/family members/loved ones and plan to share our renovation progress to the community via our Facebook page @Fairhaven Senior Services.

Fairhaven is a non-profit 501c3 organization affiliated with the United Church of Christ that has been a part of the Whitewater Community for over 60 years.

Architects of the renovation are Eppstein Uhen Architects of Milwaukee and Madison, Dan Schindhelm, Project Manager and VJS Construction Services of Pewaukee Chris Sauve, Vice President will oversee the construction.

Questions may be directed to Brian Robinson or Paul Kuenning.
